

## 3-PHASE DALI TRACK SYSTEM

Are you already familiar with our versatile 3-phase DALI surface-mounted tracks? The modern design combined with the customisable layout of the track system offers an attractive lighting option for your projects. Get an overview of our 3-phase DALI product range in our webshop!

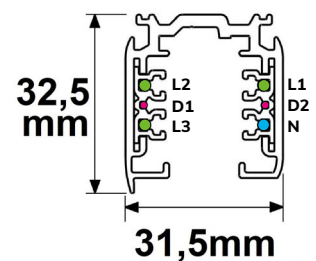

### 3-PHASE DALI SURFACE-MOUNTED TRACKS

Our DALI dimmable 3-phase track systems are perfect for a wide range of applications, from shop lighting to office or residential lighting.

2 METERS  116209  116210

3 METERS  116211  116212

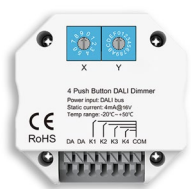

Note: With the 3-phase DALI surface-mounted track, you can also install 3ph track spotlights with a 3ph Euro adapter without a DALI signal conductor. These non-dimmable spotlights can be switched on and off via one of the three phases. Of course, the 3Ph track spotlights can also be combined with the individually controlled and dimmable DALI 3Ph track spotlights. This enables a particularly versatile, cost-effective and efficient lighting solution!

## DALI HV LED TRACK LIGHTS: EFFICIENCY AND DESIGN AT ITS BEST

The modern design of the focusable 3-phase track spotlights is further emphasised thanks to the invisible DALI Inline Driver, which fits seamlessly into the track system. The spotlights are available in 12W, 24W and 42W and in the colours black and white.
