MADE IN AUSTRIA

HEATING MADE SIMPLE

Are you looking for a way to heat your home cost-efficiently and effectively while adding visual highlights at the same time?

Discover our infrared heaters with light now!

Easy to upgrade!

With our infrared panels you can quickly upgrade and optimise existing heating systems in a few simple steps.

Uncomplicated assembly

Whether heating panel or light frame - assembly and installation are simple and require no professional electrician.

It doesn't get any greener than this!

Do you have a photovoltaic system? Then heating with infrared is currently the most sustainable and ecological form of heating for you.

LED LIGHT FRAME

INFRARED HEATING WITH LIGHT

- Continuously dimmable from 1.900 to 4.000 Kelvin
- 2.500 to 5.800 Lumen
